Crosswords

VERTICAL

1. Simple marine organism with a porous body that filters water for feeding and gas exchange.
2. Living being, whether a plant, animal, fungus, bacterium, or any other type of life, that can carry out vital processes.
3. Natural environment where an organism or a community of organisms lives and develops.
4. marine invertebrate that lives in colonies and forms calcium carbonate structures, creating coral reefs.
5. Association of fisherman that organizes and regulated fishing activities in a specific community.
9. European Union program that funds projects related to nature conservation and climate action.
11. Conservation initiative aimed at restoring marine habitats.

HORIZONTAL

5. Person who is dedicated to fishing, especially in coastal communities.
6. Type of soft coral that forms fan-shaped colonies, common in coral reefs.
7. Process of assisting the recovery of an ecosystem that has been degraded, damaged or destroyed.
8. Science that studies the interactions between organisms and their environment.
10. Person who is dedicated to studying and researching in a specific field of science.
12. Small aquatic invertebrate that lives in colonies and forms lattice-like structures on underwater substates.
13. It refers to the depth, especially in a marine context, where sunlight hardly reached and pressure is high.

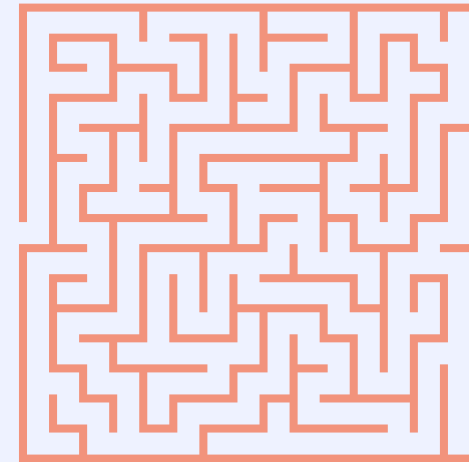

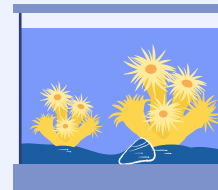

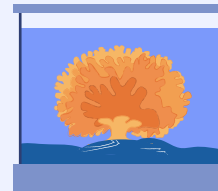

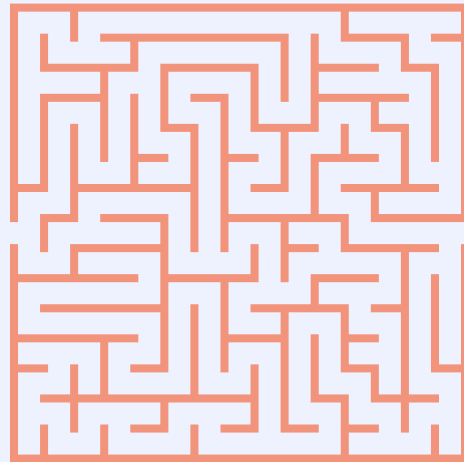

Maze

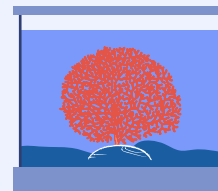

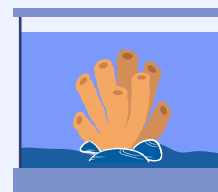

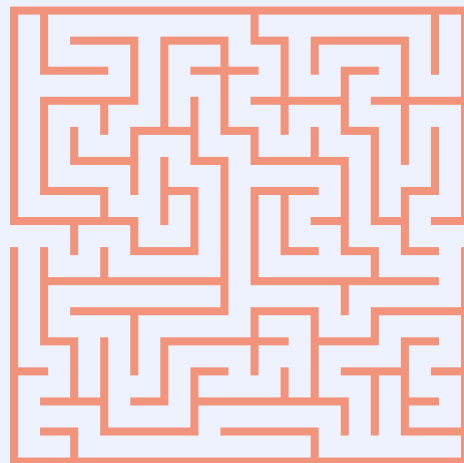

Match each species with its corresponding restoration aquarium.

Gorgonians

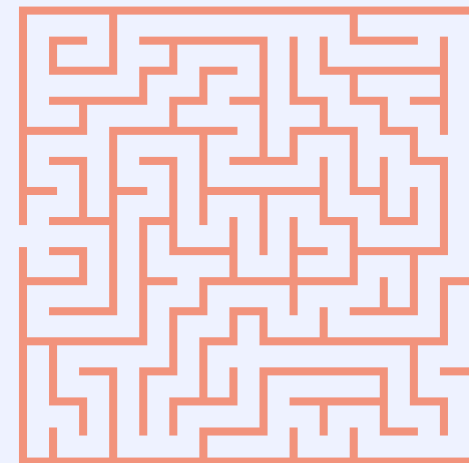

Sponges

Corals

Bryozoans
